

Nguyen Le Hoang (Leo)

Melbourne, VIC | hnguyen.leo04@gmail.com | linkedin.com/in/leo-hnguyen | leohngdev.github.io

SUMMARY

IT graduate (Software Development major, Games Development minor) with hands-on experience in full stack web development, agile delivery with real clients, and game/engine programming. Comfortable across the stack, from debugging legacy backends to shipping production features.

EDUCATION

Monash University — Bachelor of Information Technology

Feb 2023 - Dec 2025

Major: Software Development | Minor: Games Development

Coursework: Object-Oriented Programming, Database Systems, Web Development, Game Design, 3D Animation

- Built game prototypes in Unreal Engine and Unity (C++, C#) covering gameplay mechanics, AI systems and AR/VR experiences.
- Created and textured 3D character models in Maya and Substance Painter with topology optimised for realtime rendering.
- Built full stack web applications using HTML, CSS, JavaScript, Node.js and PHP (CakePHP), and designed and tuned PostgreSQL databases.

EXPERIENCE

Software Developer — ANTSA (Industry Experience Project)

Jul – Nov 2025

Monash University · Melbourne, Australia

- Worked in an agile team of five to overhaul the questionnaire engine of a live Australian digital mental health platform (Nest.js / PostgreSQL / React Native).
- Rebuilt scoring from hardcoded to fully dynamic: custom categories, severity thresholds, configurable weighting with auto-redistribution, and reverse scoring.
- Extended the new scoring logic into the clinician dashboard and PDF export report.
- Rebuilt a broken multiservice dev environment from scratch and resolved a silent bug causing incorrect answer options across the mobile app.
- Delivered a 100% UAT pass rate across two client signed iterations.

Hackathon Participant — Monash University

Feb – Mar 2023

Melbourne, Australia

- Prototyped software and game concepts under 24–48 hour constraints using Agile.
- Delivered functional demonstrations under tight deadlines.

Robotics Team Member — FRC Team

Aug 2020 – Mar 2022

Ho Chi Minh City, Vietnam

- Programmed robot navigation and sensor systems in Python and C++.
- Collaborated on autonomous component design and presented technical updates to mentors.

TECHNOLOGIES

Languages: Python, Java, C++, C#, JavaScript, TypeScript, HTML, CSS, PHP, SQL

Web & Backend: Node.js, Nest.js, React, React Native, CakePHP, PostgreSQL, MySQL, REST APIs

Game & 3D: Unreal Engine, Unity, Maya, Substance Painter, AR/VR, Character Rigging & Animation

Ways of Working: Git & GitHub, Agile / Scrum, UAT, Code Review, CI/CD, Debugging legacy systems
